

### Issues opening cworks in Access 2007

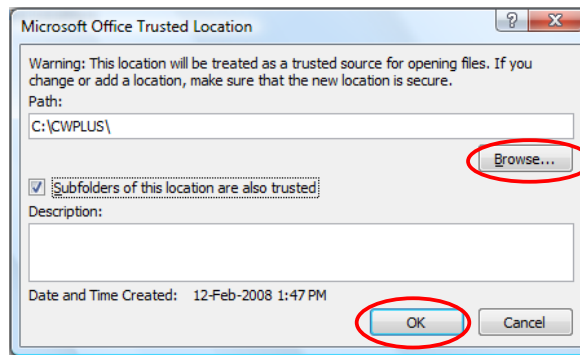

1. Open Microsoft Access as following **Start -> All Programs -> Microsoft Office -> Microsoft Access 2007.**
2. Click on the Office logo as seen in the screenshot above, and then click on “**Access Options**” button on the bottom of the list as highlighted.
3. The following screen will be visible, browse to Trust Center, and then click on the “**Trust Center Settings...**”

4. In the following screenshot click on *“Trusted Locations”* on the left pane and then click on the *“Add new location...”* button to add new trusted location.

5. In the following form click on **“Browse”** button to select the Cworks installation folder (default C:\CWPLUS\or C:\Cworks SQL Client). Ensure that the checkbox **“Subfolders of this location are also trusted”** is ticked before selecting **“OK”**.

6. Once the location is saved as trusted site, browse to Macro Settings from the Screenshot in step 4. In this screen select the last option “**Enable All Macro (.....to run)**” then select “**OK**”.
