## CUSTOMIZATION SERVICES

## TRAINING SERVICES

## IMPLEMENTATION SERVICES

### Asset Module

Create and track parent child and siblings relationship (asset hierarchy).  
- Display work history for each asset. - Display total work order costs for each asset. - Display bill of material (BoM) of each asset for better critical spares management. - Allow external attachments e.g. MS Excel, PDF, Jpeg and more.

### Administration Module

Create security set up for each user. - Create accessibility by module for each user.

### Location Module

Organize location by assigning codes. - Users can also use location codes to raise service work order. - Display assets belonging to a particular location. - Display work order history by location. - List of employee assigned to a location.

### Work Order Module

Track who, what, where, why, when and how of each maintenance job. - Track employee hours and costs on each job. - Track spares and consumables on each job. - Allow multiple employees to be assigned to a work order. - Allow re-opening of closed work orders. - Allow prioritizing and categorizing job for easy planning. - Capture failure code and prevention taken. - Advanced search options with multiple fields. - Allow to add attachment on safety instruction or job plan - Easy exporting to Excel for quick reporting.

### PM Meters (Inspections)

Record inspection information for operational and statutory requirements. - Generate mitigating work orders when readings are outside threshold bands. - Generate mitigating work orders when incremental limits are reached  
Scheduling by meter or time (whichever comes first). - Accommodate multiple meter or time scheduling segregations (whichever comes first)

### Preventive Maintenance Module (Time Based)

Schedule work orders based on scheduled or actual time completion. - Generate PM work orders using three time based scheduling methods. - Accommodate multiple time scheduling segregations. - Schedule different scheduling frequencies types. - Display PM man-hours by week.

### Material Module

Track spare parts transaction such as receive, issues and returns. Make adjustments to stock balance due to expiration and obsolescence. - Allow to issue spares from work order module. - Track reorder and min max level. - Allow display list of materials transaction. - Able to generate purchase proposal based on min and max level.

### Report Module

We have various types of reports. - Fast screen based filter and search list reports for fast reporting. - Integrates MS Excel for easy report writing on a familiar platform.
